

## How the Man got on the Moon

There was once an old sad man who had always wanted to go to the moon. He was called Rob and he hated his job at a shopping centre. At the age of 62 he realised he had a miserable life. He shared his home, which was a small cottage, with his wife Mary, who was 59 years old. She had a long operation on her knees, and had to use crutches to help her keep her balance. Even after this operation Mary carried on working at a garden centre.

They lived together for many years but Rob was still sad because he wanted to travel to space and land on the moon. A few years later Rob got the chance to be an ASTRONAUT! So he finally got his wish, so he went to the moon. Rob's wife Mary missed him a lot but she was brave and held her own. When Rob arrived at the moon with other astronauts he wanted to stay. So when they left they agreed to leave him behind, where he was alone. He started to shed tears...
