## Maths "Learn Its"

Dear Parents,

We will continue our termly system of focusing on key elements of the Maths curriculum that the children need to know, remember and understand in their year group.

At the beginning of each term, we will send home Maths "Learn Its" with examples of conversations, games, or activities using household objects. There is no need to record anything in writing, nor is there a requirement to bring anything into school to show your child's teacher. It is purely to help develop your child's Maths knowledge and understanding in a (hopefully) fun, relaxed and interactive way. Research shows that if children can see the point of Maths in real life contexts, they value it more and understand it better.

We have also included some of the visual models (such as Bar Models, number-lines and arrays) that your child will be using at different points in the year to support their thinking and share their working out / understanding. These are purely for your information, although you may like to ask your child to explain them to you.

We will send the next set of "Learn Its" home at the beginning of next term. We hope they are helpful for you and your child's learning.

Yours sincerely

Tim Clarke  
Maths Leader
